

CASEMENT, AWNING & PICTURE WINDOWS

Quality First... Service Second to None
Since 1957

Green Shield Option Package In A Casement Window

B.F. Rich Casement & Awning windows feature equal-lite frames so they align beautifully with stationary or architectural shape frames. Concealed hinges create a sleek appearance inside and out. Innovative and patented casement hardware technology offers a 90° opening for optimum ventilation and the ability to clean the window from the inside of your home. Our casement multi-point locking system allows for easy operation and provides security and a tight seal. Our casement series is available with Low-E and Argon filled energy efficient glass and carries the ENERGY STAR™ label. White, beige or brown exteriors are available.

*"Thinking Globally,
Acting Locally"*

For Your Home

- Warmest Glass
- Year Round Comfort
- Reduced Loss of Heat
- Cleaner Window Glass
- Improved Indoor Air Quality
- Better Clarity - More Light

For Our Planet

- Reduce Your CO2 Emissions
- Reduce Your Fossil Fuel Use
- Reduce Your Carbon Footprint

Shown are beige casements flanking a picture window. A great choice for new construction as well as remodeling. Casement windows are equipped with hardware that ensures reliable, near-effortless operation.

Shown is pre-finished maintenance free interior wood grain laminate with the thermal efficiency and dependability of advanced vinyl window engineering.

Applied WB brick mold surround.

A half circle with extended legs over top of a casement with brick mold & STDL grilles.

Envirosealed Technology™ is a trademark of Truseal Technologies, Inc. UltraVue™ screen is GreenGuard Certified. B.F. Rich is an Energy Star partner.

Nesting Hardware

The stylish nesting cover and full-flip handle provide an attractive design. Conveniently located within easy reach, the folding crank has smooth, reliable operation. The nesting hardware also minimizes the interference with window treatments such as curtains or blinds.

Twin casement windows installed side-by-side with internal Queen Anne style grilles provide a great view of the outdoors and full ventilation.

Awning windows open from the bottom outward to let fresh air in while keeping the rain out.

When opening a window requires one to reach over a kitchen sink or counter, casement and awning windows are a perfect choice.

Casement windows are offered in a wide variety of multi-unit configurations to please contemporary tastes.

Faux meeting rails transform the appearance of a traditional casement, awning or stationary window to have the look of a double-hung window. (Faux meeting rail shown on left and right PW / double-hung in center)

Architectural shape stationary windows add a distinctive architectural element to any home.
